

SharpSafe Sharps Disposal

Extreme care must be taken when disposing of sharp waste.

The Moving Edge SharpSafe Waste containers are specifically designed to handle sharps waste, and incorporate a lockable lid for safety once the container is full.

We offer two services, the first is to provide the container on its own, it is then the responsibility of the end user to ensure the container is processed when full in accordance with Environmental Protection Act & Waste Management regulations.

The second service is to provide the SharpSafe container with a free post return service, once the bin is full, simply lock the lid down and post it back. On receipt of the bin, we issue a waste transfer certificate which needs to be signed and returned, following which we will process the waste in accordance with Environmental Protection Act & Waste Management regulations.

| Volume (Ltr.) | Weight Kg | Packaging Dimensions (cm.) | Packaging Quantity | Colour | Part Code |
|---------------|-----------|----------------------------|--------------------|--------|-----------|
| 0.2 | 0.056 | | 1 | Yellow | SS020 |
| 0.6 | 0.11 | | 1 | Yellow | SS06 |
| 2 | 0.21 | | 1 | Yellow | SS2 |
| 4 | 0.31 | | 1 | Yellow | SS4 |
| 7 | 0.434 | | 1 | Yellow | SS7 |
| 13 | 0.586 | | 1 | Yellow | SS13 |

Sharps Disposal Service

It couldn't be simpler

Stage 1

Order your sharps bin by phone. Be sure to specify that you would like the waste disposal service included. All of our bins have a unique serial number, which is logged so we can track the life cycle bin.

Stage 4

COBA Europe now process the waste in accordance with the hazardous waste regulation act.

Stage 2

When your bin is full, simply click the non-returning lid down, and post it back to us using the FREEPOST service.

Stage 3

On receipt of the bin, we will send you your Waste Transfer Certificate, which you sign and return for your records.

0.2 Ltr - Ideal for Used Blades

Designed specifically for the disposal of GR8 blades. A non-return petal aperture ensures that once disposed of, sharps cannot be removed.

- Welded construction for added strength and safety
- Flip top lid for temporary and final closure
- Penetration tray for added safety
- In mould label which cannot be removed
- Complies with UN, BS and AFNOR standards

0.6 Ltr - Ideal for Used Blades

The 0.6 Ltr is specifically shaped to contain the maximum amount of sharps in the minimum amount of space. The flip top lid combines security with ease of use whilst the final locking feature ensures total security during transportation for final disposal.

- Welded construction for added strength and safety
- Flip top lid for temporary and final closure
- Penetration tray for added safety
- Puncture resistance base
- Class leading leak resistance
- In mould label which cannot be removed
- Complies with UN, BS and AFNOR standards
- Fold away carrying handle

2 Ltr - Ideal for Used Blades

- In mould label which cannot be removed
- Simple four click assembly
- Translucent lid
- Large 'headroom'
- Inkjet printed fill line and waste segregation message
- Temporary and final closure feature
- Large aperture with internal safety flap
- Complies with UN 3291, BS 7320 and french AFNOR nx30-500 standards

4 Ltr - Ideal for Used Blades

The 4 Ltr provides the ideal combination of cost effectiveness and portability in areas of low to medium usage. A wide aperture allows the easy disposal of used blades and a translucent lid, clear internal flap and visible fill line help ensure that the 4 Ltr is not overfilled.

- In mould label which cannot be removed
- Simple four click assembly
- Translucent lid
- Large 'headroom'
- Inkjet printed fill line and waste segregation message
- Temporary and final closure feature
- Large aperture with internal safety flap
- Complies with UN 3291, BS 7320 and french AFNOR nx30-500 standards

7 Ltr - Ideal for Disposable Knives

The 7 Ltr provides the ideal combination of cost effectiveness and portability in medium usage areas. A wide aperture allows the easy disposal of approximately 50 disposable knives and a translucent lid, clear internal flap and visible fill line help ensure that the 7 Ltr is not overfilled.

- In mould label which cannot be removed
- Simple four click assembly
- Translucent lid
- Large 'headroom'
- Inkjet printed fill line and waste segregation message
- Temporary and final closure feature
- Large aperture with internal safety flap
- Complies with UN 3291, bs 7320 and french AFNOR nx30-500 standards

13 Ltr - Ideal fro Disposable Knives

The 13 Ltr provides the ideal combination of cost effectiveness and portability in heavy usage areas. A wide aperture allows the easy disposal of approximately 100 disposable knives and a translucent lid, clear internal flap and visible fill line help ensure that the 13 Ltr is not overfilled.

- In mould label which cannot be removed
- Simple four click assembly
- Translucent lid
- Large 'headroom'
- Inkjet printed fill line and waste segregation message
- Temporary and final closure feature
- Large aperture with internal safety flap
- Complies with UN 3291, BS 7320 and french AFNOR nx30-500 standards
